SUMMARY

I'm a senior product designer with **8+ years** of making complex software easier to understand and safer to use. Most recently I led UX for **N3xgen Agentic OS**, an enterprise AI platform where IT, operations and compliance teams build, test, approve and audit automated workflows. Before that I designed payment flows for a global B2B platform, learning experiences at BYJU'S and a social discovery app from the ground up. I work end to end, from discovery and information architecture to design systems and design QA, and I prototype in **React and Next.js** with AI coding tools so teams can test real behaviour early.

8+ yrs
designing web and mobile products since 2018

40%+
higher task completion after a payments redesign

2
enterprise AI platforms led end to end in 2026

UX + code
I prototype my designs in React and Next.js

EXPERIENCE

Senior UX Designer · CloudGen Systems Pvt Ltd

Feb 2024 – Jun 2026

Lead UX for N3xgen Agentic OS, an enterprise AI platform used by IT admins, process architects, analysts and compliance teams to run and monitor automated workflows.

- Designed **Mission Control dashboards**, guided task flows, dry-run states, confirmations and safety locks, so people can see what a workflow will do before they let it act.
- Brought event timelines, structured logs and raw JSON together into **one audit review experience** for banking and healthcare teams.
- Built responsive **React and Next.js prototypes** and UI components with AI coding tools, and worked with engineers on edge cases, feasibility and design QA.
- Created reusable **Figma components, tokens and interaction patterns** shared across Agentic OS, a data pipeline builder, an energy dashboard and other enterprise products.
- Ran design critiques and phase-gate reviews with product, engineering, AI/ML and security leads, and kept a shared decision log so choices stayed traceable.

Freelance UX/UI & Front-End Designer · Genie Connections

Feb 2023 – Jan 2024

A social discovery app, designed from the first sign-up screen to the first conversation.

- Designed onboarding, matching, messaging and location-aware features, including the **privacy, permission and consent states** that are easy to leave until last.
- Built interactive Figma and coded prototypes, ran **three rounds of usability testing**, and used the findings to simplify onboarding and notification flows.

Senior UX Designer & Front-End UI Contributor · TILLI Software India

May 2022 – Jan 2023

Payments and account settings for a global B2B platform.

- Redesigned payment setup and transaction flows; **task completion rose by more than 40%** in usability testing.
- Merged scattered notification preferences into one clear settings panel and partnered with engineers on the responsive build.

Senior Product Designer · uxwithanilg@gmail.com · +91 95535 78760

EXPERIENCE

UX/UI Designer · BYJU'S — Think & Learn

Jan 2022 – May 2022

- Designed K–12 lessons, quizzes, video-player states and progress feedback with a clear hierarchy and **touch-friendly interactions** for young learners.

UX/UI Designer · Krify Software Technologies

Mar 2018 – Oct 2021

- Designed **web and mobile products** for a range of clients, from requirements and user flows to wireframes, high-fidelity UI and prototypes.
- Built reusable UI patterns and developer specs, and worked with front-end teams to fix responsive issues before release.

SELECTED WORK

N3XGEN Agentic

LEAD UX · 6 WEEKS · 2026

An AI-native integration platform. Replaced a 25-screen wizard with an agent canvas and five clear human decision points. Defined a crew of eight AI agents with autonomy levels, approvals and undo, a nine-group information architecture, and a design system of 45 component sets.

AgenticOS

LEAD UX · 10 WEEKS · 2026

An enterprise AI agent platform. Took a dense dark-mode admin tool to a calm, light-mode product. Cut the core model from five objects to three, ranked 13 innovation bets, and designed sandbox runs, run replay and approval flows on a 218-component system.

Full case studies, research and screens are in my **portfolio ↗**

SKILLS

UX research & strategy	Stakeholder and user interviews, contextual inquiry, heuristic evaluation, competitor analysis, personas, JTBD, journey mapping, usability testing
Interaction design & IA	Information architecture, navigation and naming, user flows, wireframing, interaction design, prototyping, micro-interactions, edge cases
AI & enterprise UX	Human-in-the-loop flows, explainable AI (confidence, reasons, undo), approvals and audit trails, Copilot UX, enterprise dashboards
Visual design & systems	Design systems, Figma variants and variables, design tokens, typography, colour, branding, responsive design, accessibility (WCAG 2.1 / 2.2 AA)
Product & delivery	Problem framing, prioritisation (RICE, MoSCoW), HEART metrics, UX writing, workshops, design critique, Dev Mode handoff, design QA
Vibe coding	AI-assisted prototyping in React and Next.js; HTML, CSS, Tailwind CSS, Bootstrap, Git and GitHub, GitHub Copilot
Design tools	Figma, FigJam, Figma Dev Mode, Adobe XD, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Jira, Confluence
Motion & animation	Adobe After Effects, Adobe Premiere Pro, Lottie, ProtoPie, Principle, Figma Smart Animate

EDUCATION

Google UX Design Professional Certificate
Google · Coursera

Bachelor of Commerce (B.Com.)
Undergraduate degree

Looking for a senior product or UX role where AI, data or money make the work *hard.*
